

Please do not change anything about the "Do Not Call" law in NJ. Before this list I use to receive up to 6 calls a day! Now if I receive 1 a month that's a lot. I hate being called at home by people looking to sell to me. I find it more intrusive than say Howard Stern talking about lesbian strippers. Let's leave Howard Stern alone and start concentrating on these obnoxious phone calls being made right into our homes. At least people can turn Howard Stern off or change the station. There is no getting away from these phone calls. If you don't answer, they call you back. If you do answer, they keep you on the line forever. Even when I tell these companies to take me off their list, they continue to call. Taking care of real problems like this is what we pay the FCC for. Not limiting freedom of speech on the radio for one disc-jockey.
